Quotation of 50-100kg/h Soap Making Machine Line

1.Introduction:

In order to accurately match the production needs of customers of different sizes, we provide "modular soap production line" and "integrated small equipment" to help you put into production efficiently

Small production line with 100kg/h

Integrated design, reduced floor space,suitable for small and medium-sized enterprises

Big Production Line with 500kg/h

Applicable to big soap molding production line

2.Finished product display:

Our soap machine can make soaps of various shapes and shapes. You can choose different shapes according to your own formula.

3.Working principle

The core of soap making machines is to transform raw materials into soap through the process of pretreatment → chemical reaction (saponification) → separation and purification → drying and molding. Saponification reaction is the key chemical reaction, while stirring, heating, separation and other equipment ensure reaction efficiency and product quality. Industrial equipment achieves large-scale production through automated control (temperature, time, stirring speed).

7.How to pack?

Related Machines:

8.Full Modular Soap Production Line

A complete, automated system for end-to-end soap production, including:

Mixing & saponification → Molding → Cutting → Drying → Packaging

Precision & consistency: Ensures uniform quality, hygiene, and compliance with safety standards.

Scalable & adaptable: Supports rapid formula and packaging changes for varied production demands.

Energy-efficient & eco-friendly: Optimized for sustainable, high-output manufacturing.

After receiving payment from customers , sales should reconfirm the basic requirements of the machine configuration, voltage hertz, accessories and other basic requirements as soon as possible, and then send a purchase order to the workshop as soon as possible in order to save time of customers.

Make sure to keep the pictures before and after the packaging before shipping, and reconfirm whether the shipping list is consistent with the purchase order and the customer's needs.

After receiving the bill of lading, prepare the packing list and invoice for customs clearance and other customs clearance documents that the customer may need as soon as possible.

Every one week, two weeks and or one month (determined by the voyage), follow up the freight forwarder to check the latest route of the customer's cargo and inform the customer about the newest arrival time.

Please remind customers to bring customs clearance information to the freight forwarder to prepare for customs clearance ten days before the arrival of the goods.

Please contact customers in time to follow up the latest progress of customs clearance and transportation, remind customers to check whether the packaging is in good condition, and protect the packaging during transportation to avoid damage to the machine.

Must contact customers to guide the wire connection,using and precautions before and during operation.

After sales follow up must be provided every month, and any after-sales problems are reported and resolved in time. If the after-sales problems are not resolved as required, according to the seriousness of the circumstances, sales will be warned, punished, and expelled in accordance with the company's rules and regulations.

9.If you have any other useful suggestion about our after sales service,welcome to contact us at susan@pelletmilling.com any useful suggestion will get extra \$100 from our company as gift,welcome everyone!
