Different models of the grain grinder machine:

The fineness of final products depend on the size of the screen mesh.

Specification of Screen Mesh Size: 0.2mm, 0.4mm, 0.6mm, 0.8mm, 1mm, 1.5mm, 2mm, 4mm, 6mm, 8mm, 10mm.By changing different screens, customers can get final product with different fineness.

Provide a Variety of Different Diameter Sieves

0.2mm Powder Sieve

0.4mm Powder Sieve

0.6mm Powder Sieve

**Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.**

Working principle:

The claw type grinder mainly includes cover, rotor assembly, screen, feeding device, rack and other parts. The body and the rotor form the smash room. The crushing is done in the crushing chamber. When the material enter into the crushing chamber, Under the continuous collision of the round teeth and flat teeth, they will be quickly broken into fine powder, then under the action of centrifugal force and air flow, through the sieve, and discharged out from the outlet.

With Structure of Disc Fixed Claws

More Durable grinding Disc, Finer grinded powder.

Exquisite Workmanship Feeding Hopper

High Quality, Healthy, and Safety.

**Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.**
